KS3 Maths Study Guide (with online edition) - Higher This bestselling work has introduced hundreds of thousands of professionals and students to motivational interviewing (MI), a proven approach to helping people overcome ambivalence that gets in the way of change. William R. Miller and Stephen Rollnick explain current thinking on the process of behavior change, present the principles of MI, and provide detailed guidelines for putting it into practice. Case examples illustrate key points and demonstrate the benefits of MI in addictions treatment and other clinical contexts. The authors also discuss the process of learning MI. The volume's final section brings together an array of leading MI practitioners to present their work in diverse settings. For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. This volume brings together selected papers from the 17th EBES Conference, organized in Venice in winter 2015. The theoretical and empirical papers present the latest research in diverse areas of business, economics, and finance from many different regions. They chiefly focus on the interactions between economic development, entrepreneurship and financial institutions, especially putting the spotlight on cross-country evidence. Topics range from women's entrepreneurship and economic regulation, to sustainability and climate change. This book provides researchers, professionals, and students a great opportunity to catch up on the latest studies in different fields and empirical findings on many countries and regions. A concise guide to all things historical, this feast of facts and compelling stories recounts the revolutionary ideas, acts, and inventions that have changed the world. Beginning with a section on historical eras, this popular reference source tracks history and organizes information in 13 specific subject sections, ranging from politics and war to science and religion. It tackles exploration and settlement, technological advances, legal fireworks, financial and business events, social movements, natural and man-made disasters, medicine and disease, and art and culture. From the

Stone Age to sports, from the Trojan War to the Arab Spring, and from the Hippocratic Oath to the internet, this is the perfect companion for history buffs of any age. The true story behind the Nazi saboteurs captured on Long Island in 1942, their betrayal by J. Edgar Hoover, and the shameful secret behind the case that established the reputation of the FBI. At 4 AM on a foggy morning in 1942, Nazi submarines discharged eight men along the coasts of Long Island and Florida. A few days later, J. Edgar Hoover further burnished his reputation by announcing the swift capture of Nazi soldiers found prowling our shores, intent on sabotage. Omitted from the record (and still denied by the FBI) is the true story behind Hoover's greatest publicity coup: the saboteurs' leader, George Dasch, betrayed his own country by turning himself in first to a disbelieving FBI. Hoover promised Dasch clemency and assurances that the jerry-rigged "military tribunal" created to try the men as "unlawful combatants" was merely a formality to protect loved ones from Nazi retribution. Using documentation from the FBI archives, interviews and memoirs, David Alan Johnson carefully recounts the mounting betrayals in this utterly engrossing saga. New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. Summarizes core information for quick reference in the workplace, using tables and checklists wherever possible. Essential reading for safety officers, company managers, engineers, transport personnel, waste disposal personnel, environmental health officers, trainees on industrial training courses and engineering students. This book provides concise and clear explanation and look-up data on properties, exposure limits, flashpoints, monitoring techniques, personal protection and a host of other parameters and requirements relating to compliance with designated safe practice, control of hazards to people's health and limitation of impact on the environment. The book caters for the multitude of companies, officials and public and private employees who must comply with the regulations governing the use, storage, handling, transport and disposal of hazardous substances. Reference is made throughout to source documents and standards, and a Bibliography provides guidance to sources of wider ranging and more specialized information. Dr Phillip Carson is Safety Liaison and QA Manager at the Unilever Research Laboratory at Port Sunlight. He is a member of the Institution of Occupational Safety and Health, of the Institution of Chemical Engineers' Loss Prevention Panel and of the Chemical Industries Association's 'Exposure Limits Task Force' and 'Health Advisory Group'. Dr Clive Mumford is a Senior Lecturer in Chemical Engineering at the University of Aston and a consultant. He lectures on several courses of the Certificate and Diploma of the National Examining Board in Occupational Safety and Health. Transparent electronics is emerging as one of the most promising technologies for the next generation of electronic products, away from the traditional silicon technology. It is essential for touch display panels, solar cells, LEDs and antistatic coatings. The book describes the concept of transparent electronics, passive and active oxide semiconductors, multicomponent dielectrics and their importance for a new era of novel electronic materials and products. This is followed by a short history of transistors, and how oxides have revolutionized this field. It concludes with a glance at low-cost, disposable and lightweight devices for the next generation of ergonomic and functional discrete devices. Chapters cover: Properties and applications of n-type oxide semiconductors P-type conductors and semiconductors, including copper oxide and tin monoxide Low-temperature processed dielectrics n and p-type thin film transistors (TFTs) - structure, physics and brief history Paper electronics - Paper transistors, paper memories and paper batteries Applications of oxide TFTs - transparent circuits, active matrices for displays and biosensors Written by a team of renowned world experts, Transparent Oxide Electronics: From Materials to Devices gives an overview of the world of transparent electronics, and showcases groundbreaking work on paper transistors

It covers a wide range of topics starting from applications of nanomaterials in perovskite solar cells, pharmacy, and dentistry to self-assembled growth of GaN nanostructures on flexible metal foils by laser molecular beam epitaxy. It also includes other interesting topics such as advancement in carbon nanotubes; processing techniques, purification and industrial applications, metal di-chalcogenides for waste water treatment and recent advancement in nanostructured-based electrochemical biosensors for pathogen detection and many more. The book will be of great interest to researchers, professionals and students working in the areas of nanomaterials and nanotechnology. In 1937 Ernest Hemingway traveled to Spain to cover the civil war there for the North American Newspaper Alliance. Three years later he completed the greatest novel to emerge from "the good fight," For Whom the Bell Tolls. The story of Robert Jordan, a young American in the International Brigades attached to an antifascist guerilla unit in the mountains of Spain, it tells of loyalty and courage, love and defeat, and the tragic death of an ideal. In his portrayal of Jordan's love for the beautiful Maria and his superb account of El Sordo's last stand, in his brilliant travesty of La Pasionaria and his unwillingness to believe in blind faith, Hemingway surpasses his achievement in The Sun Also Rises and A Farewell to Arms to create a work at once rare and beautiful, strong and brutal, compassionate, moving, and wise. "If the function of a writer is to reveal reality," Maxwell Perkins wrote to Hemingway after reading the manuscript, "no one ever so completely performed it." Greater in power, broader in scope, and more intensely emotional than any of the author's previous works, it stands as one of the best war novels of all time. For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. Future Directions in Postal Reform brings together leading practitioners, world-wide postal administrations, and the courier industry, as well as a number of regulators, academic economists, mailers, and lawyers, to examine some of the major policy and regulatory issues facing the postal and delivery industry. Issues addressed include international postal policy; the universal service obligation; regulation; competition, entry, and the role of scale and scope economies; the nature and role of cost analysis in postal service; productivity; interaction of law and economics; and future technologies and service standards. The creator of the incredibly popular webcomic xkcd

presents his heavily researched answers to his fans' oddest questions, including "What if I took a swim in a spent-nuclear-fuel pool?" and "Could you build a jetpack using downward-firing machine guns?" 100,000 first printing. Rose Gregory lived a life that most people envied and had everything a teenage girl could possibly want. She lived in the suburbs, but her mind always wandered to the inner city streets where she attended school. Her classmate, Kenyatta Caine knew those streets very well since his family controlled them. After attending a party at the home of Kenyatta's family, their worlds collide and Rose finds herself smack in the middle of a dream turned reality. Will she make it out unscathed or will she fall victim to the cold streets? From Steven Wilson, whose gripping debut, *Voyage of the Gray Wolves*, was hailed as "a taut, suspenseful, engaging, and frightening saltwater thriller"* comes a story of the world at war, of two countries bound together by hope--and the common foe that could destroy that hope in one devastating strike. . . In the early days of World War II, Great Britain is fighting for its life. With the Nazi Luftwaffe and U-boat wolfpacks bearing down, they've never needed America more. In secret, Winston Churchill travels by sea to Newfoundland to meet with President Franklin D. Roosevelt. When the Nazis learn of the meeting, they deploy their greatest weapon--the *Sea Lion*, a juggernaut even more dangerous than the sunken *Bismark*. Its sole mission--track and destroy Churchill's convoy. But in the prime minister's protective Naval cordon is the *HMS Firedancer*, commanded by Captain George Hardy. A veteran of too many hard-fought battles, Hardy struggles to balance duty and honor against the destruction he has wrought in the service of his country. But his most daunting task is still to come. Now, in the merciless North Atlantic, the pride of the Nazi fleet will confront the defiant might of the Allies--with the fate of the war lying in the hands of the victor. . . "A gripping, superbly told story of war at sea." --Peter Sasgen, author of *War Plan Red*

Hilary Kay held the first auction of rock & roll collectibles ever at Sotheby's in 1981. With 625 specially commissioned photographs (200 in color) from private collections and from Sotheby's own archives, this book opens up the world of rock & roll nostalgia for collectors who spend thousands on artifacts--and for those whose memories are flusher than their bank accounts. This advanced undergraduate-level text presents the quantum theory in terms of qualitative and imaginative concepts, followed by specific applications worked out in mathematical detail. In view of the current high level of interest in explosive metal- working processes this report has been prepared to review the status of forming materials with high explosives. The information presented has been obtained from the open literature and from firms active in this work. Explosives and their characteristics are described along with discussions of general explosive- forming techniques. More detailed treatment is given to descriptions and requirements of facilities, die designs and materials, and current applications and practice in the forming of sheet, plate, and tubular products. In addition, the response of materials to high velocity forming is described in terms of effects on microstructures, formability, and mechanical properties. Methods of determining peak pressures and energy requirements are presented in an appendix along with appropriate nomographs.
