Cognitive Radio, Mobile Communications and Wireless

Networks Dec 19 2021 This book provides an overview

of the latest research and development of new

technologies for cognitive radio, mobile

communications, and wireless networks. The

contributors discuss the research and requirement

analysis and initial standardization work towards 5G

cellular systems and the capacity problems it

presents. They show how cognitive radio, with the

capability to flexibly adapt its parameters, has been

proposed as the enabling technology for unlicensed

secondary users to dynamically access the licensed

spectrum owned by legacy primary users on a

negotiated or an opportunistic basis. They go on to

show how cognitive radio is now perceived in a much

broader paradigm that will contribute to solve the

resource allocation problem that 5G requirements

raise. The chapters represent hand-selected expanded

papers from EAI sponsored and hosted conferences

such as the 12th EAI International Conference on

Mobile and Ubiquitous Systems, the 11th EAI International Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness, the 10th International Conference on Cognitive Radio Oriented Wireless Networks, the 8th International Conference on Mobile Multimedia Communications, and the EAI International Conference on Software Defined Wireless Networks and Cognitive Technologies for IoT.

African multilingualism and the Agenda 2030 / Multilinguisme africain et l'Agenda 2030 Aug 03 2020

The UN Agenda 2030 read as an expression of a commitment to predefined goals, raises the question of a link, between failure to provide for needs of linguistic inclusion on the one hand and lingering deficits of adherence on the other. Stated as a key factor for implementation sensitivity to language diversity correlates positively with inclusivity and sustainability, as this volume explains through case studies ranging from agriculture to health, education, human rights and ecology, and from digital inclusion to translation and science, thus enabling comparative advantages to turn language barriers into interfaces for 'glocal' development.

Complexity Perspectives on Language, Communication and Society Oct 29 2022 The “language-communication-society” triangle defies traditional scientific approaches. Rather, it is a phenomenon that calls for an integration of complex, transdisciplinary perspectives, if we are to make any progress in understanding how it works. The highly diverse agents in play are not merely cognitive and/or cultural, but also emotional and behavioural in their specificity. Indeed, the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms. New complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emo-cognitive dynamic and holistic models. We have to enter into dialogue with the complexity views coming out of other more ‘material’ sciences, but we also need to take steps in the linguistic and psycho-sociological fields towards creating perspectives and concepts better fitted to human characteristics. Our understanding of complexity is different - but not opposed - to the one that is more commonly found in texts written by people working in physics or computer science, for example. The goal of this book is to extend the

knowledge of these other more 'human' or socially oriented perspectives on complexity, taking account of the language and communication singularities of human agents in society. Our understanding of complexity is different - but not opposed - to the one that is more commonly found in texts written by people working in physics or computer science, for example. The goal of this book is to extend the knowledge of these other more 'human' or socially oriented perspectives on complexity, taking account of the language and communication singularities of human agents in society.

Promoting Justice, Human Rights and Conflict Resolution through International Law / La promotion de la justice, des droits de l'homme et du règlement des conflits par le droit international Nov 17 2021 This

Liber Amicorum is published at the occasion of Judge Lucius Caflisch's retirement from a distinguished teaching career at the Graduate Institute of International Studies of Geneva, where he served as Professor of International Law for more than three decades, and where he has also held the position of Director. It was written by his colleagues and friends, from the European Court of Human Rights, from universities all around the world, from the Swiss Foreign Affairs Ministry and many other national and international institutions. The Liber Amicorum Lucius Caflisch covers different fields in which Judge Caflisch has excelled in his various capacities, as scholar, representative of Switzerland in international conferences, legal adviser of the Swiss Foreign Affairs Ministry, counsel, registrar, arbitrator and judge. This collective work is divided into three main sections. The first section examines questions concerning human rights and international humanitarian law. The second section is devoted to the international law of spaces, including matters regarding the law of the sea, international waterways, Antarctica, and boundary and territorial issues. The third section addresses issues related to the peaceful settlement of disputes, both generally and with regard to any particular means of settlement. The contributions are in both English and French.

Communication and Mental Illness Dec 27 2019

Communication and Mental Illness is a comprehensive and practical textbook written by a multidisciplinary group of experts in the field of mental health which will be of interest to all those interested in improving their understanding of individuals with mental illness. The book is divided into three parts. The first of these offers both student and experienced clinicians in the mental health field an improved theoretical knowledge of the methods of communication commonly adopted by individuals with a variety of diagnoses of mental illness. It also provides practical suggestions of how this information can improve the individual professional's management of patients. Part Two looks at how information about communication in mental illness can influence service provision, ending with suggestions for future policy and practice. Communication and Mental Illness concludes with a final part describing the state of current research into different facets of communication and mental illness, offering an insight into the variety of research methodology and points of interest to those involved in the field.

***Strategic Narratives, Public Opinion and War* Aug 22**

2019 This volume explores the way governments endeavoured to build and maintain public support for the war in Afghanistan, combining new insights on the effects of strategic narratives with an exhaustive series of case studies. In contemporary wars, with public opinion impacting heavily on outcomes, strategic narratives provide a grid for interpreting the why, what and how of the conflict. This book asks how public support for the deployment of military troops to Afghanistan was garnered, sustained or lost in thirteen contributing nations. Public attitudes in the US, Canada, Australia and Europe towards the use of military force were greatly shaped by the cohesiveness and content of the strategic narratives employed by national policy-makers. Assessing the ability of countries to craft a successful strategic narrative, the book addresses the following key areas: 1) how governments employ strategic narratives to gain public support; 2) how strategic narratives develop during the course of the conflict; 3) how these narratives are disseminated, framed and perceived through various media outlets; 4) how domestic audiences respond to strategic narratives; 5) how this interplay is conditioned by both events on the ground, in Afghanistan, and by structural elements of the domestic political systems. This book will be of much interest to students of international intervention, foreign policy, political communication, international security, strategic studies and IR in general.

Corporate and Organizational Identities Aug 15 2021
This edited book is devoted to an issue of increasing importance in management theory and practice-organizational identity. The concept of organizational identity has received attention in many disciplines such as strategic management, marketing, communication and public relations and organization theory. In practice a number of consultancy firms have specialized in identity management, while a number of academic conferences with a special focus on identity has developed. As globalisation of business and of organizations of all kinds become the norm rather than the exception, issues of collective identities take on a strategic importance. There has been, however, very little integration among the various disciplines and practices, resulting in conflicting definitions, and little cumulative research. The aim of *Organizational Identities* is to further understanding about collective identities by bringing together contributions from various management disciplines. To this end, the editors have developed an integrative framework - the five-facet framework - that allows articulation of contributions from disciplines as diverse as strategic management, organization theory, marketing and communication. Sixteen scholars from Europe and the

US have contributed nine chapters that explore various aspects of collective identities using this five-facet framework. The result is the first book to bring together contributions from various fields and integrate them into a single conceptual framework. The book will be useful both for academics and for practitioners. It includes a balance of theoretical and empirical chapters, and presents original empirical data drawn from field research in a variety of settings.

Treaty Series; Publication of Treaties and International Engagements Registered with the Secretariat of the League Jun 12 2021

"Devant Le Deluge" and Other Essays on Early Modern Scientific Communication Nov 29 2022 Fifteen readable essays examine topics such as editorial policy in the early journals, the economic side of scientific publishing in the 17th and 18th centuries, aspects of journal indexing, early modern scientific networks, and the issues of authorship and authority. The whole constitutes a body of work that reveals both the richness and scope for further inquiry that has motivated Kronick for decades.

***Communication and Social Order Feb 27 2020* A great deal of attention has been devoted to risk research. Sociologists in general have limited themselves to**

varying recognitions of a society at risk and have traced out the paths to disaster. The detailed research has yet to be undertaken. In Risk, now available in paperback, Niklas Luhmann develops a theoretical program for such research. His premise is that the concept of risk projects essential aspects of our description of the future onto the present. Risk is conceived as the possibility of triggering unexpected, unlikely, and detrimental consequences by means of a decision attributable to a decision maker.
