Increasingly congested public roads provide few opportunities to enjoy driving to the full, and yet modern performance cars are the most exciting ever – hence the booming appeal of track days. This extensively illustrated color book contains all the information needed to enjoy track days to the maximum, providing a sound introduction for complete novices: Introduction to track days – the track-day scene, track-day cars, what to expect at a track day, driving instruction: Car preparation – safety preparation, brakes, tires, engine and suspension, noise regulations, insurance: Track-day driving – the basics, driving techniques, the racing line, braking and accelerating, wet-weather driving, dealing with traffic. Covering everything cat owners need to know, this practical guide to looking after the most popular pet in the United States is the perfect reference for any cat lover. The Complete Cat Care Manual provides detailed information on the day-to-day care of kittens and adult cats, including feeding, training, handling, exercising, essential equipment, and grooming. Detailed chapters outline the reasons behind behavioral problems, such as eating houseplants and scratching furniture, and provide tips for changing unacceptable behavior. Health problems are completely detailed with anatomical diagrams, diagnostic charts, and illustrations that identify symptoms and treatments. Step-by-step instructions teach all the techniques needed to nurse a sick animal or administer emergency first aid. Hundreds of remarkable color photographs, specially commissioned for this book, detail every aspect of a cat’s life. The material is based on extensive research. Dr. Bruce Fogle, a leading specialist in pet behavior, has observed hundreds of cats during his years as a veterinary surgeon. He identifies how cats communicate through posture, body language, facial expressions, “speaking” (meowing and hissing), and rituals like rubbing, swatting, and grooming. He discusses the differences between learned behavior and instinctual action, the importance of a cat’s sensory perceptions like smell, touch, and sound—and when a cat’s eccentricities are due to genetics or are merely a matter of individual temperament. Endorsed by the American Society for the Prevention of Cruelty to Animals. This practical guide to materials and techniques for visual artists provides a basic introduction to color theory, the art of mixing pigments, painting and drawing methods, essential tools and materials, working with various media, creative ideas for composition, interviews with leading artists, and sample works. “CMOS Simplified: The Chicago Manual of Style 17th Made Easy” is specifically designed for students and professional writers to quickly learn updated Chicago Style in a convenient and easy way both: 1. Excerpt from De Witt's American Chess Manual: Containing Full Instructions for Young Players, by an Old Chess Player; Also, the New Rules of the Game, Adopted by the American Chess Association in 1880 IN adding a Chess Manual to the series of DE witt's hand books OF games the publishers have endeavored to occupy a space in current chess literature which has been too long vacant and that is; to present a work on Chess which would at once be readably interesting and specially instructive to young chess players, while at the same time its low price would place it within the reach of all. The primary fault of the Chess Manuals hitherto published, has been that they have either been written too much on the scientific plan, if we may so express it, or, in going to the other extreme have been made so Simple in their wording as to be devoid of interest to the more intelligent class of readers. The happy medium has been the one thing sought for by the editor of this Manual. In doing this he has endeavored to combine instructive and interesting reading, and added such information in regard to the prominent events of the American chess world as would be appropriate for a Manual of the game. In the first part of the Manual will be found a guide to young beginners in the game, from the pen of Mr. Charles H. Stanley, taken from a work on chess, published by Mr. De Witt some twenty years ago. These chapters cannot well be improved upon, and as they were written when that chess veteran was in his prime we present them unchanged.
