Notes on Directing Dec 19 2021 Some years ago, Frank Hauser, then a retired freelance director, and writer Russell Reich, his former student, self-published *Notes on Directing* in hardcover. It was immediately acclaimed as "a gem-witty and full of insight;" "so sensible, so complete, and so right;" and "amazingly illuminating" by the likes of Judi Dench, Edward Albee, and Terry Teachout. Gathered over Frank Hauser's long career, and polished to a sharp edge by Russell Reich, the 130 "Notes" address a wide range of topics, from understanding the script and defining the director's role, to casting, how to handle a first read-through of a script, rules for rehearsal, how to talk to actors, how to get a laugh, and the key elements of staging. Filled with enduring good advice expressed in assertive, no-nonsense language, and supported with explanatory commentary, insightful quotes and examples, and six valuable appendices, this deceptively slim book has the impact of a privileged apprenticeship, providing deep insight into the hidden process of creating a live, shared experience. For the student or professional engaged in a directing or acting career, the executive or manager looking for inspiring new ideas on leadership, or the arts lover wanting insight into the creative process, this book will be an invaluable experience. This new edition includes an interview with the co-author.

Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and

experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage of managing strategic risk."--Publisher's description.

Becoming a teacher Sep 27 2022 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Maarten Troost has charmed legions of readers with his laugh-out-loud tales of wandering the remote islands of the South Pacific. When the travel bug hit again, he decided to go big-time, taking on the world's most populous and intriguing nation. In *Lost on Planet China*, Troost escorts readers on a rollicking journey through the new beating heart of the modern world, from the megalopolises of Beijing and Shanghai to the Gobi Desert and the hinterlands of Tibet. *Lost on Planet China* finds Troost dodging deadly drivers in Shanghai; eating Yak in Tibet; deciphering restaurant menus (offering local favorites such as Cattle Penis with Garlic); visiting with Chairman Mao (still dead, very orange); and hiking (with 80,000 other people) up Tai Shan, China's most revered mountain. But in addition to his trademark gonzo adventures, the book also delivers a telling look at a vast and complex country on the brink of transformation that will soon shape the way we all work, live, and think. As Troost shows, while we may be familiar with Yao Ming or dim sum or the cheap, plastic products that line the shelves of every store, the real China remains a world—indeed, a planet--unto itself.
