Throughout the fourteenth century AD/eighth century H, waves of plague swept out of Central Asia and decimated populations from China to Iceland. So devastating was the

Black Death across the Old World that some historians have compared its effects to those of a nuclear holocaust. As countries began to recover from the plague during the following century, sharp contrasts arose between the East, where societies slumped into long-term economic and social decline, and the West, where technological and social innovation set the stage for Europe's dominance into the twentieth century. Why were there such opposite outcomes from the same catastrophic event? In contrast to previous studies that have looked to differences between Islam and Christianity for the solution to the puzzle, this pioneering work proposes that a country's system of landholding primarily determined how successfully it recovered from the calamity of the Black Death. Stuart Borsch compares the specific cases of Egypt and England, countries whose economies were based in agriculture and whose pre-plague levels of total and agrarian gross domestic product were roughly equivalent. Undertaking a thorough analysis of medieval economic data, he cogently explains why Egypt's centralized and urban landholding system was unable to adapt to massive depopulation, while England's localized and rural landholding system had fully recovered by the year 1500. (www.canammissing.com) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event. After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people

missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement. There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches. There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same.

George Knapp, Host, Coast to Coast AM (www.canammissing.com) Missing 411-The Devil's in the Detail. This is the fourth book in the blockbuster "Missing 411" series that describes unusual incidents of people that have disappeared in National Parks and forests of the world. It is a significant step forward in the understanding of the missing phenomena that adds several new

elements never before identified. This book describes additional victims, new locations and circumstances while outlining new geographical clusters. The number of people that fit the identified profile and the distances and elevations covered during their journeys will mesmerize you. The book ends with series of charts that expose specific elements that are identified in each of the other books, their frequency, location and timing. **It is highly recommended that you read any of the other "Missing 411" books prior to this. Almost all ecological and conservation work involves carrying out a census or survey. This practically focussed book describes how to plan a census, the practical details and shows with worked examples how to

analyse the results. The first three chapters describe planning, sampling and the basic theory necessary for carrying out a census. In the subsequent chapters international experts describe the appropriate methods for counting plants, insects, fish, amphibians, reptiles, mammals and birds. As many censuses also relate the results to environmental variability, there is a chapter explaining the main methods. Finally, there is a list of the most common mistakes encountered when carrying out a census. ‘ A stimulating, elegant yet pugnacious essay ’ —Observer

In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the ‘ otherness ’ of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West ’ s romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. David Paulides, a former police investigator, has applied his skills to questioning Bigfoot witnesses. The results he has achieved in gaining access to witnesses and getting detailed information from them is both remarkable and intriguing. Furthermore, he commissioned a forensic police artist to meet with witnesses and sketch the creatures they saw. These drawings provide insights into the creature's nature never before realized. The result of this team's work is by far one of the most convincing accounts ever written on Bigfoot. The conclusion reached -

that this creature, long revered by the Hoopa people, definitely inhabits the forested regions of Humboldt County in Northern California - is so convincing that those people who doubt Bigfoot's existence will be forced to think again! This volume provides a comprehensive catalog of how various ethnic groups in the United States of America have differently shaped their cultural landscape. Author John Cross links an overview of the spatial distributions of many of the ethnic populations of the United States with highly detailed discussions of specific local cultural landscapes associated with various ethnic groups. This book provides coverage of several ethnic groups that were omitted from previous literature, including Italian-Americans, Chinese-Americans, Japanese-Americans, and Arab-Americans, plus several smaller European ethnic populations. The book is organized to provide an overview of each of the substantive ethnic landscapes in the United States. Between its introduction and conclusion, which looks towards the future, the chapters on the various ethnic landscapes are arranged roughly in chronological order, such that the timing of the earliest significant surviving landscape contribution determines the order the groups will be viewed. Within each chapter the contemporary and historical spatial distribution of the ethnic groups are described, the historical geography of the group 's settlement is reviewed, and the salient aspects of material culture that characterize or distinguish the group 's ethnic landscape are discussed. *Ethnic Landscapes of America* is designed

for use in the classroom as a textbook or as a reader in a North American regional course or a cultural geography course. This volume also can function as a detailed summary reference that should be of interest to geographers, historians, ethnic scholars, other social scientists, and the educated public who wish to understand the visible elements of material culture that various ethnic populations have created on the landscape. This volume, first published in 1996, examines various social movements from a comparative perspective. Some of the most visited national parks in the country have a dark side. Aside from crowds of hikers, campers, and general tourists, there's a dark side to these three locations in California; the famous Yosemite, Joshua Tree and Mount Shasta. From strange disappearances, grisly murders and bone-chilling paranormal hauntings and ghost sightings; these pristine locales have a lot more to offer than just serene hiking trails or camping. In this second installment of National Park Mysteries & Disappearances, Steve Stockton, along with Bill Melder, presents the reader with a side to these locations you've never heard before. So, put aside your nature guidebooks, forget about the pretty leaves, and the relaxing streams as well as the miniature golf, the funnel cakes and all the other "tourist traps" and prepare for a wild ride on the dark side of these major national parks. The book, "" Antiquities of the Jews; Book - XIII "" , has been considered important throughout the human history, and so that this work is never forgotten we have made efforts in its

preservation by republishing this book in a modern format for present and future generations. This whole book has been reformatted, retyped and designed. These books are not made of scanned copies and hence the text is clear and readable. A non-fiction book about people who are missing by way of land, air and water. Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. The books have been vetted by some of the top journalists in the world with statements such as; "David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time." Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed." The author continues with his profile points involving the disappearances and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these cases believe

their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for. This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities. Pages Author: David Paulides Date Published: August 29, 2015. Further research into Middle America bigfoot sightings indicates a strong connection between bigfoot and Native Americans, and witness descriptions show a strong human likeness. The latest research from the author of the groundbreaking *The Hoopa Project: Bigfoot Encounters in California* named 2008 Bigfoot Book of the Year by Cryptomundo.com. Dave Paulides brings his law-enforcement investigative and analytical skills to an expanded area of research: the counties in Northern California that have reported the greatest numbers of bigfoot occurrences, and beyond to Minnesota and Oklahoma. Gaining access to many people who have

never discussed their bigfoot experiences publicly before now, the author obtains intriguing details that broaden our perception of the elusive creature; and his subsequent analysis leads to the discovery of a strong and consistent link between bigfoot and the Native American community. The expert interview and artistic skills of forensic artist Harvey Pratt help to define the creatures described by the witnesses - - once again with astonishing and illuminating results. The presentation of startling new forensic evidence indicates that there truly is an as-yet-unidentified primate living in the wilds of North America, and the author hints at new data on the horizon that will finally provide the tantalizing truth about the existence of bigfoot in North America. Presents alphabetically arranged reference entries on religion and its role in modern film, covering such topics as religious themes, symbols, well-known films that deal with religious topics, and noted directors. This is the first major study of gender and property in South Asia. In a pioneering and comprehensive analysis Bina Agarwal argues that the single most important economic factor affecting women's situation is the gender gap in command over property. In rural South Asia, the most significant form of property is arable land, a critical determinant of economic well-being, social status, and empowerment. But few women own land; fewer control it. Drawing on a vast range of interdisciplinary sources and her own field research, and tracing regional variations across five countries, the author investigates the complex barriers to women's land

ownership and control, and how they might be overcome. The book makes significant and original contributions to theory and policy concerning land reforms, 'bargaining' and gender relations, women's status, and the nature of resistance. (www.canammissing.com) This is the third "Missing 411" book researching facts of people who have vanished in remote locations of the world. "Missing 411-North America and Beyond" is the first edition that discusses missing people and relevant facts from five countries (Australia, England, France, Iceland and Indonesia) outside of North America and examines the parallels between the cases. The book also includes a multitude of new stories from North America. There is a continuing trend of clusters of missing people in United States National Parks. The National Park Service has continued with their policy of failing to keep ledgers, track or otherwise document lists of missing people inside their parks and monuments. This edition has cases from Florida, Texas, Hawaii and forty other states. There are new clusters of missing people from Sequoia and Mount Rainier National Park, Three Sisters Wilderness (OR) and Adirondacks (NY). Canada has missing cases from six provinces that are documented. This new book brings further clarity to the missing person issue by examining multiple disappearances of people in small-confined areas and exposing the similarities of their case. David Paulides also exposes a series of coed disappearances that date back to the early 1900's, which have unusual facts surrounding their case."Missing 411-North America and

Beyond" is the largest and most comprehensive of the trilogy, 472 pages. The Missing 411 series builds upon itself. It is recommended that you read "Missing 411-Western United States" first, then the eastern version and then "North America and Beyond." There is a historical aspect to this issue and there are common elements that run through the disappearances.

*****One of the early reviews of "Missing 411-North America and Beyond" was written by New York Times Best Selling author Whitley Strieber:David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time: the simple and awful fact that people disappear, especially in our national parks, and little effort is made to find them, let alone inform the public about the danger.Even when massive searches are mounted, and people are found, the events surrounding their loss and recovery are often far beyond logical explanation.This is the most comprehensive and expertly presented series of books on the subject ever written, and the latest volume, which includes stories from five countries, is sobering, chilling and far too well researched to ignore. This exciting and innovative Handbook provides readers with a comprehensive and globally relevant overview of the instruments, actors and design features of social protection systems, as well as their application and impacts in practice. It is the first book that centres around

system building globally, a theme that has gained political importance yet has received relatively little attention in academia. Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary, Off the Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included. Updated tables from past books assist the reader in understanding the vast numbers of missing that fit the established profile. Early reviewers of this book have called it the most intriguing and thought-provoking of the series. Author David Paulides is an investigative reporter, twenty-year police officer/detective and the director of the Canam Missing Project (www.canammissing.com), the organization behind the search for understanding the

missing person issue. He recently released a movie based on the books, Missing 411, which a former LA Magazine and NBC movie critic rated it the best documentary for 2017. He has presented his findings to the most attended annual search and rescue conference in the world, NASAR and has spoken at hundreds of seminars, symposiums, and meetings. Mr. Paulides has a bachelors and masters degree from the University of San Francisco and currently resides in Denver.

Missing-411 is the first comprehensive book about people who have disappeared in the wilds of North America. It's understood that people routinely get lost, some want to disappear but this story is about the unusual. Nobody has ever studied the archives for similarities, traits and geographical clusters of missing people, until now. A tip from a national park ranger led to this three year, 7000+ hour investigative effort into understanding the stories behind people who have vanished. The book chronicles children, adults and the elderly who disappeared, sometimes in the presence of friends and relatives. As Search and Rescue personnel exhaust leads and places to search, relatives start to believe kidnappings and abductions have occurred. The belief by the relatives is not an isolated occurrence; it replicates itself time after time, case after case across

North America. The research depicts 28 clusters of missing people across the continent, something that has never been exposed and was a shocking find to researchers. Topography does play a part into the age of the victims and certain clusters have specific age and sex consistency that is baffling. This is not a phenomenon that has been occurring in just the last few decades, clusters of missing people have been identified as far back as the 1800's. The manuscript for the research was extremely large so the story was split between two books, Missing 411 Western United States and Canada and Missing 411 Eastern United States. The Eastern version will be released in late March and will include a list of all missing people in each edition and a concluding chapter that draws both books together for conclusions. Some of the issues that are discussed in each edition:

- * The National Park Service attitude toward missing people
- * How specific factors in certain cases replicate themselves in different clusters
- * Exposing cases involving missing children that aren't on any national database
- * Unusual behavior by bloodhounds/canines involved in the search process
- * How storms, berries, swamps, briar patches, boulder fields and victim disabilities play a role in the disappearance
- * The strategies of Search and Rescue personnel need to change under specific circumstances
