Implementing Change in Health Systems brings fresh thinking and evidence to the continuing debate about market reforms of health care and other public services. The book examines the development and implementation of national cost-containment programs and health system reorganizations in the UK, Sweden and the Netherlands — countries that have been leaders in health system reform. The book provides a new framework for analyzing public policy implementation and system change, synthesizing diverse streams of academic research and thinking. It explores the processes of implementing market reforms in each country and considers the outcomes, both expected and unintended. In all three countries competitive reform encountered serious technical, organizational and political obstacles. Yet they triggered important system changes and paved the way for significant new health policies. The complex outcomes of the reforms included — changes in the quality, efficiency and costs of care — growing managerial and political control over physicians and other health care professionals — increased influence and centrality of community-based care — Diffusion of ideas and practices from business management into health care. Implementing Change in Health Systems sheds new light on crucial policy issues that are currently being debated in the United States and many other countries. The book will be of value to students, researchers, and practitioners in health policy and public policy. Fire and Rescue Service : Session 2005-06, Vol. 2: Oral and written Evidence This study offers an overview of the development and structure of the remarkable public finances of the Dutch Republic. Comparisons with the Venetian Republic, Britain and the Ottoman Empire underline the importance of 'urbanization trajectories' in understanding differences in fiscal performance. "Accessibility and Acceptability in Technical Manuals" is written for an audience with a general interest in readability studies, linguistics and technical writing. With the main emphasis on technical manuals the book is primarily targeted at those who have a special interest in the design and use of utility texts and how these texts are received and understood by a multifaceted audience. Accessibility is not a new research area and many explanations have been offered over the past years as to why non-experts often have difficulties in comprehending texts written by technological experts. This book offers a new approach to accessibility studies by exploring not only style, but also attitudes to style, by asking text consumers which style they prefer for different parts of the manual. A key role is played by the Systemic

Functional Linguistics' notion of grammatical metaphor, a stylistic choice that is commonly used in technical literature. Grammatical metaphor although apparently obstructing the comprehension process of some readers is a common element in the preferred style that separates the insiders from the outsiders . An explanation of this rather surprising result is offered by resorting to Critical Discourse Analysis. The world's most comprehensive, well documented and well illustrated book on this subject. With extensive subject and geographical index. 145 photographs and illustrations - mostly color. Free of charge in digital PDF format on Google Books. This book uses primary evidence to assess the value of agro-input and service delivery business models in terms of their inclusiveness, effectiveness and impact from a small farmer perspective, in the form of case studies in three Indian states: Punjab, Bihar and Uttar Pradesh. The services discussed include custom rental of farm machinery and equipment, franchising for backward and forward linkage for farmers and the supermarkets for delivery of farm inputs, and extension services. The book examines agro-input and service delivery business models as institutional innovations for inclusive and effective delivery of such services in the small farmer context, based on primary data from the agencies designing and implementing such models and the farmers who make use of these inputs and services. Further, it identifies major issues and challenges in the delivery of farm inputs and services across regions and types of farmers and examines possible policy and enabling provisions to promote cost-effective and high-quality agro-input delivery channels. This book provides a comprehensive review of environmental benefit transfer methods, issues and challenges, covering topics relevant to researchers and practitioners. Early chapters provide accessible introductory materials suitable for non-economists. These chapters also detail how benefit transfer is used within the policy process. Later chapters cover more advanced topics suited to valuation researchers, graduate students and those with similar knowledge of economic and statistical theory and methods. This book provides the most complete coverage of environmental benefit transfer methods available in a single location. The book targets a wide audience, including undergraduate and graduate students, practitioners in economics and other disciplines looking for a one-stop handbook covering benefit transfer topics and those who wish to apply or evaluate benefit transfer methods. It is designed for those both with and without training in economics InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) Environment, Energy and Sustainable Development brings together 242 peer-reviewed papers presented at the 2013 International Conference on Frontiers of Energy and Environment Engineering, held in Xiamen, China, November 28-29, 2013. The main objective of this proceedings set is to take the environment-energydevelopments discussion a step further. Volume 1 of the set is devoted to Energy, power and environmental engineering, and volume 2 to Control, information and applications. Environment, Energy and Sustainable Development is intended to serve as resource material for scientists working on related topics in many disciplines, including environmental science, management science, and energy science and policy analysis, as well as for industry professionals in the wide field of energy and environmental engineering.
