Handbook on Responsible Leadership and Governance in Global Business 2020 Reading these various non-technical articles is undeniably valuable for any person (teachers, executives, students) who is concerned about the behaviour of major companies managers in the context of globalisation and economy liberalisation. Gestion 2000 A profoundly important book for scholars and leaders alike that makes a vital timely contribution to the behavioral perspectives on leadership and governance. Doh and Stumpf, along with their world-renowned contributors, apply solidly anchored academic wisdom to offer fresh ideas on restoring faith in the integrity of American enterprise. Jeffrey Sonnenfeld, Yale School of Management, President and CEO, Chief Executive Leadership Institute and author of Leadership and Governance From The Inside Out Ethics, social responsibility, leadership, governance. These terms are heard in the classroom, in the boardroom, and viewed on the front page of newspapers and magazines. Yet serious attention to the relationships among these concepts is lacking. Although commitments to leadership, ethics, and social responsibility are evident, individuals and companies are falling short in combining these duties into policies and cultures that guide behavior and decisions. The missing element is a broad-based and integrated approach to responsible leadership and governance. This volume provides the leading thinking on these issues and includes a discussion of emerging areas that require future attention. The contributors leading scholars in the fields of leadership, governance and social responsibility summarize the state of the literature, identify complementary insights and perspectives, discuss areas of conflict and disagreement, and include a provocative and stimulating agenda for further investigation. They point up practical consequences of these perspectives in light of developments that have exposed the shortcomings in practice. Several contributors focus specifically on the challenges faced by global companies in developing and maintaining leadership and governance practices that are responsive to different national institutional and cultural settings. Thorough coverage and insightful discussion make this an essential reference for scholars and students of leadership, corporate responsibility and professional ethics, as well as for all those directly responsible for establishing the ethical codes and practices of their organizations.

Based on current research and real-life examples Offers leaders a method for directing themselves more productively Written by an expert in leadership, organizational performance, and change management Through real-life examples and recent studies in psychology, management and Eastern spirituality Daft provides guidance to all of us who struggle finding our own balance and cultivating the behavior of others.

The School Leader's Guide to Learner-Centered Education Jan 13 2021 In the context of the current accountability and testing era, many school leaders have become fearful and feel disenfranchised. Their knowledge and experience are not being validated, and often they are forced to engage in practices that go contrary to what they know will provide a positive school climate and culture for their staff and students. This book will introduce a model of leadership as part of a transformation process arising from a learner-centered system. Among the issues considered by educational leaders as the most pressing are: the relationship between moral leadership and school change (based on an ethic of responsibility for preparing all learners to function in a global world); diversity: the role of school leaders to promote success for all marginalized groups of students; personalizing learning and authentically engaging students to make school more effective for all learners; incorporating learning standards and high expectations without sacrificing the personal and authentic engagement with students. This book addresses each of these concerns from the perspective of learner-centered systems, in which leaders distribute leadership among key constituents in the educational system: students, teachers, other school staff, parents, community members and empower them to engage in a lifelong learning process of continuous growth and improvement. It also provides a detailed and comprehensive treatment of LCP, as well as helpful exercises and tools that can be applied to practice.

The Leader's Guide to Unconscious Bias Jul 31 2022 A timely, must-have guide to understanding and overcoming bias in the workplace, from the experts at FranklinCovey. Unconscious bias affects everyone. It can look like the disappointment of an HR professional when a candidate for a new position asks about maternity leave. It can look like preferring the application of an Ivy League graduate over one from a state school. It can look like assuming a man is more entitled to speak in a meeting than his female junior colleague. Ideal for every manager who wants to understand and move past their own preconceived ideas, The Leader's Guide to Unconscious Bias explains that bias is the result of mental shortcuts, our likes and dislikes, and is a natural part of the human condition. And what we assume about each other and how we interact with one another has vast effects on our organizational success—especially in the workplace. Teaching you how to overcome unconscious bias, this book provides more than thirty unique tools, such as a prep worksheet and a list of ways to reframe your unconscious thoughts. According to the experts at FranklinCovey, your workplace can

achieve its highest performance rate once you start to overcome your biases and allow your employees to be whole people. By recognizing bias, emphasizing empathy and curiosity, and making true understanding a priority in the workplace, we can unlock the potential of every person we encounter.

Unleashed Mar 15 2021 The Power of Empowering Others Leadership isn't easy. It takes grit, courage, and vision, among other things, that can be hard to come by on your toughest days. When leaders and aspiring leaders seek out advice, they're often told to try harder. Dig deeper. Look in the mirror and own your natural-born strengths and fix any real or perceived career-limiting deficiencies. Frances Frei and Anne Morriss offer a different worldview. They argue that this popular leadership advice glosses over the most important thing you do as a leader: build others up. Leadership isn't about you. It's about how effective you are at empowering other people—and making sure this impact endures even in your absence. As Frei and Morriss show through inspiring stories from ancient Rome to present-day Silicon Valley, the origins of great leadership are found, paradoxically, not in worrying about your own status and advancement, but in the unrelenting focus on other people's potential. Unleashed provides radical advice for the practice of leadership today. Showing how the boldest, most effective leaders use a special combination of trust, love, and belonging to create an environment in which other people can excel, Frei and Morriss offer practical, battle-tested tools—based on their work with companies such as Uber, Riot Games, WeWork, and others—along with interviews and stories from their own personal experience, to make these ideas come alive. This book is your indispensable guide for unleashing greatness in other people . . . and, ultimately, in yourself. To learn more, please visit [theleadersguide.com](http://theleadersguide.com).
