Design your life May 12 2021 Ten years ago, Clare Nash was struggling with a common problem: how to be an architect and still have a life. With no job, no savings and no clients in the midst of a recession, Clare set up her own practice with little more than a few postcards in local shop windows and a very simple website. Determined to better combine her life and family with professional work, she created an innovative practice that is flexible and forward-looking, based around remote working and the possibilities offered by improving technology. Bursting with tips, ideas and how-tos on all aspects of designing a working life that suits you and your business, this book explains in clear and accessible

language how to avoid the common pitfalls of long hours and low pay. It explores how to juggle work with family commitments, how to set your own career path and design priorities, and how to instil a flexible working culture within a busy lifestyle. Encompasses the full range of life-work challenges: Money, fees and cashflow Playing to your personal strengths Outsourcing areas of weakness Building a happy and productive remote-working team Creating a compelling marketing strategy Juggling parenthood and work Studying and honing workplace skills Provides the inside view from innovative practices: alma-nac, Gbolade Design Studio, Harrison Stringfellow Architects, Invisible Studio Architects, Office S&M Architects, POoR Collective, Pride Road Architects and Transition by Design.

Beyond Order Aug 22 2019 The companion volume to 12 Rules for Life offers further guidance on the perilous path of modern life. In 12 Rules for Life, clinical psychologist and celebrated professor at Harvard and the University of Toronto Dr. Jordan B. Peterson helped millions of readers impose order on the chaos of their lives. Now, in this bold sequel, Peterson delivers twelve more lifesaving principles for resisting the exhausting toll that our desire to order the world inevitably takes. In a time when the human will increasingly imposes itself over every sphere of life—from our social structures to our emotional states—Peterson warns that too much security is dangerous. What's more, he offers strategies for overcoming the cultural, scientific, and psychological forces causing us to tend toward tyranny, and teaches us how to rely instead on our instinct to find meaning and purpose, even—and especially—when we find ourselves powerless. While chaos, in excess, threatens us with instability and anxiety, unchecked order can petrify us into submission. Beyond Order provides a call to balance these two fundamental principles of reality itself, and guides us along the straight and narrow path that divides them.

The School of Life Nov 29 2022 THE SUNDAY TIMES BESTSELLER Take some time to reflect and refocus this winter, with the essential guide on how to live wisely and well, no matter what challenges the world throws at you - from Alain de Botton, the bestselling author of The Consolations of Philosophy, The Art of Travel and The Course of Love This is a book about everything you were never taught at school. It's about how to understand your emotions, find and sustain love, succeed in your career, fail well and overcome shame and guilt. It's also about letting go of the myth of a perfect life in order to achieve genuine emotional maturity. Written in a hugely accessible, warm and humane style, The School of Life is the ultimate guide to the emotionally fulfilled lives we all long for - and deserve. This book brings together ten years of essential and transformative research on emotional intelligence, with practical topics including: - how to understand yourself - how to master the dilemmas of relationships - how to become more effective at work - how to endure failure - how to grow more serene and resilient Praise for Alain de Botton: 'What he has managed to do is remarkable: to help us think better so that we may live better lives' Irish Times 'A serious and optimistic set of practical ideas that could improve and alter the way we live' Jeanette Winterson, The Times 'Alain de Botton likes to take big, complex subjects and write about them with thoughtful and deceptive innocence' Observer

Books do Furnish a Life Dec 19 2021 'A rich feast of his essays, reviews, forewords, squibs and conversations, in which talent and passion are married to deep knowledge.' Matt Ridley 'Enjoy the unfailing clarity of his thought and prose, as well as the grandeur of his vision of life on Earth.' - Mark Cocker, Spectator 'Richard Dawkins is a thunderously gifted science writer.' Sunday Times Including conversations with Neil DeGrasse Tyson, Steven Pinker, Matt Ridley and more, this is an essential guide to the most exciting ideas of our time and their proponents from our most brilliant science communicator. Books Do Furnish a Life is divided by theme, including celebrating nature, exploring humanity, and interrogating faith. For the first time, it brings together Richard Dawkins' forewords, afterwords and introductions to the work of some of the leading thinkers of our age - Carl Sagan, Lawrence Krauss, Jacob Bronowski, Lewis Wolpert - with a selection of his reviews to provide an electrifying celebration of science writing, both fiction and non-fiction. It is also a sparkling addition to Dawkins' own remarkable canon of work. Plenty of other scientists write well, but no one writes like Dawkins... here is Dawkins the teacher, the scholar, the polemicist, the joker, the aesthete, the poet, the satirist, the man of compassion as well as indignation, the slayer of superstition and, above all, the scientist. - Areo Magazine

A Bump in Life Apr 30 2020 Features true stories of mothers who went through unplanned pregnancies and managed to grow in grace and wisdom.

Story of Life Dec 31 2022 At first, nothing lived on Earth. It was a noisy, hot, scary place. Choking gas exploded from volcanoes and oceans of lava bubbled around the globe... Then in the deep, dark ocean, something amazing happened. This is an exciting and dramatic story about how life began and developed on Planet Earth, written especially for younger children. The authors explain how the first living cell was created, and how the cells multiply and create jellyfish and worms, and then fish with bendy necks, which drag themselves out of the water into swampy forests. They tell the story of the biggest creatures that have ever walked on land - the dinosaurs. Long after that, hairy creatures who have babies, not eggs, take over, stand on two legs and spread around the world, some of them living through cataclysmic events such as ice ages and volcanic eruptions. Everyone living today is related to these survivors. With delightful illustrations including lots of detail and humour, all carefully researched and checked, this book shows the development of life on Earth in a truly accessible and simple way.

Cities for Life Aug 27 2022 In cities around the world, planning and health experts are beginning to understand the role of social and environmental conditions that lead to trauma. By respecting the lived experience of those who were most impacted by harms, some cities have developed innovative solutions for urban trauma. In *Cities for Life*, public health expert Jason Corburn shares lessons from three of these cities: Richmond, California; Medellín, Colombia; and Nairobi, Kenya. Corburn draws from his work with citizens, activists, and decision-makers in these cities over a ten-year period, as individuals and communities worked to heal from trauma—including from gun violence, housing and food insecurity, poverty, and other harms. *Cities for Life* is about a new way forward with urban communities that rebuilds our social institutions, practices, and policies to be more focused on healing and health.

12 Rules for Life Sep 27 2022 The #1 Sunday Times and International Bestseller from 'the most influential public intellectual in the Western world right now' (New York Times) What are the most valuable things that everyone should know? Acclaimed clinical psychologist Jordan Peterson has influenced the modern understanding of personality, and now he has become one of the world's most popular public thinkers, with his lectures on topics from the Bible to romantic relationships to mythology drawing tens of millions of viewers. In an era of unprecedented change and polarizing politics, his frank and refreshing message about the value of individual responsibility and ancient wisdom has resonated around the world. In this book, he provides twelve profound and practical principles for how to live a meaningful life, from setting your house in order before criticising others to comparing yourself to who you were yesterday, not someone else today. Happiness is a pointless goal, he shows us. Instead we must search for meaning, not for its own sake, but as a defence against the suffering that is intrinsic to our existence. Drawing on vivid examples from the author's clinical practice and personal life, cutting edge psychology and philosophy, and lessons from humanity's oldest myths and stories, *12 Rules for Life* offers a deeply rewarding antidote to the chaos in our lives: eternal truths applied to our modern problems.

Origins and Evolution of Life Apr 10 2021 Devoted to exploring questions about the origin and evolution of life in our Universe, this highly interdisciplinary book brings together a broad array of scientists. Thirty chapters assembled in eight major sections convey the knowledge accumulated and the richness of the debates generated by this challenging theme. The text explores the latest research on the

conditions and processes that led to the emergence of life on Earth and, by extension, perhaps on other planetary bodies. Diverse sources of knowledge are integrated, from astronomical and geophysical data, to the role of water, the origin of minimal life properties and the oldest traces of biological activity on our planet. This text will not only appeal to graduate students but to the large body of scientists interested in the challenges presented by the origin of life, its evolution, and its possible existence beyond Earth.

Cells, Gels and the Engines of Life Dec 07 2020 This book challenges the current wisdom of how cells work. It emphasizes the role of cell water and the gel-like nature of the cell, building on these features to explore the mechanisms of communication, transport, contraction, division, and other essential cell functions. Written for the non-expert, the book is profound enough for biologists, chemists, physicists and engineers.--From publisher description.
