Appearing in the feminist social science literature from its beginnings are a series of questions about methodology. In this collection, Sandra Harding interrogates some of the classic essays from the last fifteen years in order to explore the basic and troubling questions about science and social experience, gender, and politics. Among the many achievements of the feminist movement of the 1970s was the unprecedented influx of women into academia. Over the last 25 years, women have entered the social sciences in huge numbers - bringing with them new perspectives and new insights into the social world. This special issue of The Annals reflects on this multivocal, richly textured, and dynamic revolution. From anthropology to psychology to geography to

criminology and more, leading feminists reflect on the most significant contributions of feminist activism and feminist research to their fields. Two main themes run through this volume: the relationship between feminist scholarship and feminist activism, and the enduring controversies and future direction of feminist social science. The contributions run the gamut from the impact of feminism on specific social science disciplines such as family studies, archaeology, political science, and media studies to the influence of feminist thought on specific topics such as federally funded social science, migration, media practices, and sexuality. The main conclusion of this volume is that, "where reigning paradigms are strong and the accepted methodologies are limited, feminist perspectives tend to be marginalized. On the other hand, fields that are theoretically eclectic and interdisciplinary appear to be the most welcoming to feminist influence." The second edition of the *Handbook of Feminist Research: Theory and Praxis*, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for

excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change. A comprehensive overview of feminist scholarship edited by an internationally recognized and leading figure in the field Companion to Feminist Studies provides a broad overview of the rich history and the multitude of approaches, theories, concepts, and debates central to this dynamic interdisciplinary field. Comprehensive yet accessible, this edited volume offers expert insights from contributors of diverse academic, national, and activist backgrounds—discussing contemporary research and themes while offering international, postcolonial, and intersectional perspectives on social, political, cultural, and economic institutions, social media, social justice movements, everyday discourse, and more. Organized around three different dimensions of Feminist Studies, the Companion begins by exploring ten theoretical frameworks, including feminist epistemologies examining Marxist and Socialist Feminism, the activism of radical feminists, the contributions of Black feminist thought, and interrelated approaches to the fluidity of gender and sexuality. The second section focuses on methodologies and analytical frameworks developed by feminist scholars, including empiricists, economists, ethnographers, cultural analysts, and historiographers. The volume concludes with detailed discussion of the many ways in which pedagogy, political ecology, social justice, globalization, and other areas within Feminist Studies are shaped by feminism in practice. A major contribution to scholarship on both the theoretical foundations and contemporary debates in the field, this volume: Provides an international and interdisciplinary range of the essays of high relevance to scholars, students, and practitioners alike Examines various historical and modern approaches to the analysis of gender and sexual differences

Addresses timely issues such as the difference between radical and cultural feminism, the lack of women working as scientists in academia and other research positions, and how activism continues to reformulate feminist approaches. Draws insight from the positionality of postcolonial, comparative and transnational feminists. Explores how gender, class, and race intersect to shape women's e In Feminist Challenges, new and established scholars demonstrate the application of feminism in a range of academic disciplines including history, philosophy, politics, and sociology. As Carole Pateman notes in her introduction, 'all the contributors raise some extremely far-reaching questions about the conventional assumptions and methods of contemporary social and political inquiry.' A collection of essays representing diverse approaches to feminist ethical analysis of social policy. Subjects include the Family and Medical Leave Act, combat exclusion and the role of women in the military, unwed fathers' rights, mail-order brides, pornography, breast implants, and sex-selective abortion. Paper edition (unseen), \$17.95. Annotation copyrighted by Book News, Inc., Portland, OR In Marx, Women and Capitalist Social Reproduction, Martha E. Gimenez advances a theory of social reproduction which, dialectically, views it as determined by production and as a space for the emergence of political struggles and - potentially - critical forms of consciousness. Social work is currently undergoing major change in its policies, organization and day-to-day practice and much has been written about the feminist presence in social work. In particular, feminist social work has focused on the role of women social workers in developing distinctive forms of practice, rooted in a commitment to egalitarian relationships with women service users. The State of Feminist Social Work challenges the limitations of this perspective. Tracing key ideas in feminist social work from the 1970s through to the

present day, and using data from interviews with female social workers, this book draws out tensions between the literature and the actual experience of female social workers. In doing so, it: highlights the significance for feminists of social work's location in the state enables the experiences of women social workers to be explored and placed within their structural context opens up the possibility of diverse identities, identifications and stances amongst women social workers critically examines the current state of feminist social work. *The State of Feminist Social Work* provides an important appraisal of the subject and is essential reading for all those with an interest in feminism and social work theory, practice and education. "Fresh, original, and brings together in one place a set of authors who are very important to the field." -- Mary Margaret Fonow, coeditor of *Beyond Methodology: Feminist Scholarship as Lived Research*

"Finally, a collection dedicated to demonstrating precisely what it means to do feminist research " -- Madonna Harrington Meyer, University of Illinois at Urbana-Champaign

How likely is feminist research to promote change in society? Are some research methods more successful at bringing about change than others? Contributors to this volume discuss principles of feminist inquiry, providing examples from their own experience and evaluating research practices for their potential to promote social change. The twelve chapters cover methodologies including ethnographic study, in-depth interviewing, naming, and going public. Also explored are consultative relationships between academic researchers and activist organizations, participatory and advocacy research processes, and coalition building. A wide range of issues besieges women globally, including economic exploitation, sexist oppression, racial, ethnic, and caste oppression, and cultural imperialism. This book builds a feminist social justice framework from practices of women's

activism in India to understand and work to overcome these injustices. The feminist social justice framework provides an alternative to mainstream philosophical frameworks that promote global gender justice: for example, universal human rights, economic projects such as microfinance, and cosmopolitanism. McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo-liberalism. Arguing that these frameworks emphasize individualism over interdependence, similarity over diversity, and individual success over collective capacity, McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism. Relational cosmopolitanism prioritizes our connections while, crucially, acknowledging the reality of power differences. Extending Iris Young's theory of political responsibility, McLaren shows how Fair Trade connects to the economic solidarity movement. The Self-Employed Women's Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism. Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice. The book is a rallying call for a shift in our thinking and practice towards re-imagining the possibilities for justice from a relational framework, from independence to interdependence, from identity to intersectionality, and from interest to socio-political imagination. Women's voices are brought to the fore in this comprehensive analysis of women and social change in North Africa. Focusing on grass-roots perspectives, readers will gain a rare glimpse into how both the intentional and unintentional actions of men and women contribute to

societal transformation. Most chapters are based on extensive field work that illuminates the real-life experiences, advocacy, and agency of women in the region. The book considers frequently less studied issues including migration, legal changes, oral and written law, Islamic feminism, and grass-roots activism. It also looks at the effectiveness of shelters for abused women and the changes that occurred in the wake of the 2011 Arab uprisings, as well as challenging conventional notions of feminist agency by examining Salafi women's life choices. Recommended for students and scholars, as well as international development professionals with an interest in the MENA region. After more than twenty years of feminist education research, policy development and innovative school practice, it seems appropriate to evaluate the impact and significance of this world wide struggle for social justice in education. At the same time, the recent restructuring of educational provision whether in the name of sexual equality or the ideologies of the New Right also requires a considered response from Those Committed To Promoting Greater Social Equality.; This Collection offers a unique opportunity to host an international forum on contemporary thinking and practice, not just within different national contexts, but for feminism more generally. In adopting a critical feminist approach, the chapters re-establish such egalitarian traditions as radical feminism, black feminism and socialist feminism and address such themes as the interrelation between social class, race and gender and the ways these articulate with feminist educational practice.; In gathering together leading educators from five different countries all committed to the project of social transformation, this book represents the shifting concerns of the feminist theoretical debate and helps formulate feminist educational agendas more suited to the political and economic conditions which prevail in the 1990s. Can scholars generate knowledge and

pedagogies that bolster local and global forms of resistance to U.S. imperialism, racial/gender oppression, and the economic violence of capitalist globalization? This book explores what happens when scholars create active engagements between the academy and communities of resistance. In so doing, it suggests a new direction for antiracist and feminist scholarship, rejecting models of academic radicalism that remain unaccountable to grassroots social movements. The authors explore the community and the academy as interlinked sites of struggle. This book provides models and the opportunity for critical reflection for students and faculty as they struggle to align their commitments to social justice with their roles in the academy. At the same time, they explore the tensions and challenges of engaging in such contested work. A wide-ranging analysis of grass-roots activism, migration, legal, political and religious changes as basis for social transformation. Exploring feminist social media tactics that use humor and laughter as a form of resistance to misogyny, rewiring feelings of shame into shamelessness. Online sexism, hate, and harassment aim to silence women through shaming and fear. In *Who's Laughing Now?* Jenny Sundén and Susanna Paasonen examine a somewhat counterintuitive form of resistance: humor. Sundén and Paasonen argue that feminist social media tactics that use humor, laughter, and a sense of the absurd to answer name-calling, offensive language, and unsolicited dick pics can reroute and rewire shame into a self-assured shamelessness. This important text introduces students to both feminism and other social and political theories via an examination of the inter relationship between different feminist positions and key contemporary debates. The book takes each debate in turn, outlines the main themes, discusses different feminist responses and evaluates the implications for real-life political and social issues. This user-

friendly structure effectively redraws the map of contemporary feminist thought, offering a fresh and succinct summary of an extensive range of material and graphically demonstrating the ongoing relevance and value of a feminist perspective. Comprehensive and current, this handbook combines a wide range of international contributors to chart the uneasy relationship between feminism, criminology and victimology. It explores both the historical and contemporary questions posed by feminist work and is essential reading for anyone interested in feminism, criminology and social change. In this trenchant inquiry into the state of feminism, Angela McRobbie breaks open the politics of sexual equality and 'affirmative feminism' and sets down a new theory of gender power. Challenging the most basic assumptions of the 'end' of feminism, this book argues that invidious forms of gender re-stabilisation are being re-established. Consumer and popular culture encroach on the terrain of so-called female freedom, appearing supportive of female success, yet tying women into new post-feminist neurotic dependencies. With a scathing critique of 'women's empowerment', McRobbie has developed a distinctive feminist analysis that she uses to examine socio-cultural phenomena embedded in contemporary women's lives: from fashion photography and the television 'make-over' genre to eating disorders, body anxiety and 'illegible rage'. A turning point in feminist theory, *The Aftermath of Feminism* will set a new agenda for gender studies and cultural studies. In *Feminism and the Women's Movement*, Barbara Ryan integrates a broad historical view with an analytical framework drawn from the theory of social movements. Relying on participation and observation of diverse groups involved in the woman's movement, interviews with long-term activists, and readings of historical and contemporary movement publications, she discusses the changing nature of feminist ideology and movement

organizing. Ryan portrays the successes and difficulties that women have faced in their efforts to effect social change in recent history. Providing a broad base of essential knowledge critical to undergraduate students, *Situating Feminism* will also inspire new directions in critical thought and theoretical advancement for academics and professionals in the areas of women's and culture studies, political science, social work, communication, sociology, and psychology. #MeToo. Digital networking. Facebook groups. Social media continues to be positioned by social movement scholars as an exciting new tool that has propelled feminism into a dynamic fourth wave of the movement. But how does male power play out on social media, and what is the political significance of women using male-controlled and algorithmically curated platforms for feminism? To answer these questions, Megarry foregrounds an analysis of the practices and ethics of the historical Women's Liberation Movement (WLM), including the revolutionary characteristics of face-to-face organising and the development of an autonomous print culture. Centering discussions of time, space and surveillance, she utilises radical and lesbian feminist theory to expose the contradictions between the political project of women's liberation and the dominant celebratory narratives of Web 2.0. This is the first book to seriously consider how social media perpetuates the enduring logic of patriarchy and how digital activism shapes women's oppression in the 21st century. Drawing on interviews with intergenerational feminist activists from the UK, the USA, Australia, Canada and New Zealand, as well as archival and digital activist materials, Megarry boldly concludes that feminists should abandon social media and return to the transformative powers of older forms of women-centred political praxis. This book will be of interest to scholars and students of Women's and Gender Studies, Lesbian and Queer Studies, Social

Movement Studies, Critical Internet Studies and Political Communication, as well as anyone with an interest in feminist activism and the history of the WLM. The second edition of this highly successful text is structured along the lines of the first and has been revised and updated to take into account the effects of new legislation and changes to policy. Starting with the late eighteenth century, this book explores the history of feminism within a range of countries spanning several continents. The use of a broad, comparative approach highlights the varieties of feminism and the different political and social contexts in which they have developed. Hannam identifies broad trends and changes over time and introduces recent interpretations and approaches. Key themes include the challenge made by feminists to prevailing ideas about a 'woman's place', the notions of sisterhood and solidarity and the relationship between feminism and other social and political reform movements, including nationalist struggles, socialist politics and anti-colonial movements. Feminism is suitable for undergraduate students studying feminism as part of a history, politics or sociology course. First published in 1992, this book is an historical introduction to a wide range of women's movements from the late eighteenth-century to the date of its publication. It describes economic, social and political ideas which have inspired women to organize, not only in Europe and North America, but also in the Third World. Sheila Rowbotham outlines a long history of women's challenges to the gender bias in political and economical concepts. She shows women laying claim to rights and citizenship, while contesting male definitions of their scope, and seeking to enlarge the meaning of economy through action around consumption and production, environmental protests and welfare projects. Redressing the Past argues that early English-Canadian women's drama expresses the conflict between equality feminism and maternal feminism: on the

one hand these works represent women's social and political emancipation; on the other, they affirm patriarchal structures and the status quo. This study calls into question what traditionally constitutes drama by treating plays written in non-canonical forms, mounted in non-professional venues, and published by marginal presses - or not at all - as important literary, theatrical, and historical documents. First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company. *Liberating Method* reflects the conviction that feminist insights can and should contribute to a sounder, more rigorous social science. In this book, one of the leading practitioners and teachers of feminist methodology examines profound questions about traditional and customary practices of social research. Marjorie DeVault argues that established methods too often ignore social oppression as she charts her quest for approaches that will more adequately represent marginalized groups. This book explores some of the moral and public policy issues that divide Western, especially North American, feminists as the twentieth century ends and the twenty-first century begins. It represents an in-house discussion among feminists and their social ethics. One of feminism's key contributions to improving social work practice has been to expose the gender-blindness which has characterized social work policy and literature. *Working with Men* extends and diversifies this contribution by presenting a controversial collection of essays written by feminists about men. In what has been a previously unexplored area of social work, the contributors to *Working with Men*, feminist academics, researchers and practitioners, explore the issue of feminist practice with men highlighting the dilemmas which they have encountered in undertaking this work. They contend that for too long feminists have ignored the issue of direct work with men. The argument that men must take responsibility for their own reconstruction

they assert is no longer sustainable: feminists must generate their own discourse about the nature of men and masculinity derived from their own experience of critically engaging with and challenging men. The contributors conclude that direct work with men is a legitimate feminist activity; that it is one important strand of a broader strategy whose ultimate goal is the empowerment of women. This book will be valuable reading for all students of social work and applied social science as well as social work practitioners and managers. What does a feminist urban theory look like for the twenty first century? This book puts knowledges of feminist urban scholars, feminist scholars of social reproduction, and other urban theorists into conversation to propose an approach to the urban that recognises social reproduction both as foundational to urban transformations and as a methodological entry-point for urban studies. Offers an approach feminist urban theory that remains intentionally cautious of universal uses of social reproduction theory, instead focusing analytical attention on historical contingency and social difference Eleven chapters that collectively address distinct elements of the contemporary crisis in social reproduction and the urban through the lenses of infrastructure and subjectivity formation as well as through feminist efforts to decolonize urban knowledge production Deepens understandings of how people shape and reshape the spatial forms of their everyday lives, furthering understandings of the 'infinite variety' of the urban Essential reading for academics, researchers and scholars within urban studies, human geography, gender and sexuality studies, and sociology In the past three decades, feminist scholars have produced an extraordinary rich body of theoretical writing in humanities and social science disciplines. This revised and updated second edition of *Theorizing Feminism: Parallel Trends in the Humanities and Social Sciences*, is a genuinely

interdisciplinary anthology of significant contributions to feminist theory. This timely reader is creatively edited, and contains insightful introductory material. It illuminates the historical development of feminist theory as well as the current state of the field. Emphasizing common themes and interests in the humanities and social sciences, the editors have chosen topics that remain relevant to current debates, reflect the interests of a diverse community of thinkers, and have been central to feminist theory in many disciplines. The contributors include leading figures from the fields of psychology, literary criticism, sociology, philosophy, anthropology, art history, law, and economics. This is the ideal text for any advanced course on interdisciplinary feminist theory, one that fills a long-standing gap in feminist pedagogy. With #metoo dominating headlines and an unprecedented number of women running for office, the fight for women's equality has perhaps never been higher on the political agenda. Around the world, women are fighting against unfair working conditions, restrictive abortion laws, and the frayed social safety net. The same holds true within the business world—but there's a twist: even as some women argue that pushing for more female CEOs would help the struggle for equality, other activists argue that CEOs themselves are part of the problem, regardless of gender. In *Feminist Thinking about Work*, Susan Ferguson explores the history of feminist discourse, examining the ways in which feminists have conceptualized women's work and placed labor, and its reproduction, at the heart of their program for emancipation. Engaging with feminist critiques of work, Ferguson argues that women's emancipation depends upon a reorganization and radical reimagining of all labor, and advocates for an inclusive politics that reconceptualizes women's work and work in general. This invaluable guidebook accomplishes what many others on feminist theory do not. It

reviews both the theories and the applications of the field. Too frequently, books and articles tend to focus on one or two ways for practicing feminism, when, in reality, different problems, different groups of women, and different goals may require a different theory for guiding objectiveness, strategies, and work style. Using the wrong theory for a particular group or problem may backfire, causing unexpected outcomes. This book circumvents such unforeseen results. **Feminist Theories and Social Work** reviews the most important theories of today, evaluates the contributions and limitations of each branch, and for each theory, provides application examples at several levels of intervention. * What is the relevance of feminist thought to today's society? * What do feminists mean by equality and difference? * Can we find unity in feminist thought, or only conflict? Feminism provides an introduction to some of the major debates within feminist theory and action. Focusing on the perennial question of equality and difference, the book examines the ways in which this has been played out in different areas of feminist social and political theory. Jane Freedman adopts a refreshing approach by focusing on issues rather than schools of thought. Among the subjects she examines are politics and women's citizenship, paid and unpaid employment and the global economy, sexuality and power, and race and ethnicity. Finally, the book analyses the problem of essentialism for feminism and the challenge of postmodern and poststructuralist theories. Written in a jargon-free style, this book presents a clear and concise introduction to a wide range of feminist thought. Feminist theories of social work have been criticised in recent years for treating women as a uniform category and displaying insufficient sensitivity to the complex ways in which other social divisions (those of race, age, disability, etc.) impact on gender relations. This major text by a leading writer in the

field seeks to develop a new framework for feminist social work that takes on board postmodernist arguments to do with difference and power yet retains a commitment to collective solidarity and social change. As such, it will be essential reading for students, educators and practitioners alike in social work. *Feminism and the Politics of Childhood* offers an innovative and critical exploration of perceived commonalities and conflicts between women and children and, more broadly, between various forms of feminism and the politics of childhood. This unique collection of 18 chapters brings into dialogue authors from a range of geographical contexts, social science disciplines, activist organisations, and theoretical perspectives. The wide variety of subjects include refugee camps, care labour, domestic violence and childcare and education. Chapter authors focus on local contexts as well as their global interconnections, and draw on diverse theoretical traditions such as poststructuralism, psychoanalysis, posthumanism, postcolonialism, political economy, and the ethics of care. Together the contributions offer new ways to conceptualise relations between women and children, and to address injustices faced by both groups. Praise for *Feminism and the Politics of Childhood: Friends or Foes?* 'This book is genuinely ground-breaking.' – Val Gillies, University of Westminster 'Feminism and the Politics of Childhood: Friends or Foes? asks an impossible question, and then casts prismatic light on all corners of its impossibility.' – Cindi Katz, CUNY 'This provocative and stimulating publication comes not a day too soon.' – Gerison Lansdown, Child to Child 'A smart, innovative, and provocative book.' – Chandra Talpade Mohanty, Syracuse University 'This volume raises and addresses issues so pressing that it is surprising they are not already at the heart of scholarship.' – Ann Phoenix, UCL This volume presents debates on class within an international

context. Its particular focus is on women's theorized experience of social class from a variety of feminist perspectives, contextualized in relation to the countries and regions in which they live. Using personal experience as a basis, contributors cover Australia, Bangladesh, Botswana, Britain, Canada, Czechoslovakia and the Czech Republic, India, Israel, Korea, New Zealand, Poland, and the USA - illuminating the differences and similarities between regions.; Challenging the view that "class is dead" as well as the idea that it is a British phenomenon, the book argues that class needs to be regarded as a key concept in any attempt to understand women's lives. It also reflects on personal and political experiences of class around the world in order to understand the mechanisms through which class discrimination operates and is mediated by gender, sexuality, ethnicity and racism.
